Associate Java Developer 80%-100% - IBM CIC
Location: Bern

The IBM Client Innovation Centre (CIC) is an innovative and exciting part of IBM, working as IBM Global Business Services' technical delivery partner. We continually innovate for our customers, employees and shareholders. Our Technical Skills range from Application Development (Java, Front End, Full Stack, DevOps), Testing Services, Technical Support through to Microsoft. In addition to our technical expertise we can cover Delivery through Project Managers & Project Analysts, Business or Data Analysts.

In this role you are not only part of the IBM Service Associate Program, designed to educate our next generation of talent, but you are also supporting our client project.

You are part of an agile team of developers and together you ensure the highest quality of service for our client. You create applications, microservices and back-end API's. You are involved in every step of the process, from design, development, testing release changes and troubleshoot where necessary, providing a great customer service.

Your position :

- Support the clients' agile transformation with consulting, introduction, support and optimization of agile procedures
- Take an active role in the clients' projects as a Scrum Master

Your profile:

- A degree in Computer Science (IT apprenticeship graduates, higher education in IT, bachelor)
- Experience as a software developer in an agile team
- Work experience with Java (8 or higher)
- Good knowledge of Spring Boot and Angular
- Fluent in both German and English is a must (written & spoken)
- Fluent in French is a strong plus (written & spoken)
- Swiss nationality or valid Swiss work permit / EU passport

We offer you:

- Individual career path
- Access to countless trainings and certification offerings
- A knowledge sharing culture
- An environment where you are actively contributing your ideas
- The possibility to work in projects in one of the largest IT companies
