

Dear colleagues,

The **Life Science Zurich Young Scientist Network** invites you to the 6<sup>th</sup> edition of the biggest life science career event in Switzerland: the **Zurich Life Science Day 2015!**

This year, Professor Ingo Potrykus, the inventor of Golden Rice and voted “most influential scientist” from 1995-2005 by *Nature Biotechnology*, will be the Keynote speaker of an event that will give you the opportunity to **ENERGIZE** your career.

You will hear about opportunities in Big Pharma, Intellectual Property, Research and Discovery, Academia, Consulting and Start-ups, among many other options. Moreover you will learn about how “headhunters” can help you, how to improve your CV or how to get the most out of a job interview.

**Join us on the 12<sup>th</sup> of February 2015 in the Lichthof of the Irchel Campus at the University of Zurich** and be a part of a fulfilling experience of insider talks, a company exhibition, CV checks and plenty of networking opportunities during lunch, coffee breaks and an the final apéro.

For more detailed information about the **program**, participating companies and **registration**, stay tuned on our website: <http://zlsd2015.lszysn.ch>

**The deadline for the online registration is February 5<sup>th</sup>, Hurry up and seize the opportunity, as places are limited this year!**
