

GBIF SWISS NODE 

Genesis of a multi-functional network to exchange information on biodiversity

(Collections and specimens / Field survey and observations / Sequences
and genomes)

NEUCHÂTEL

Global Biodiversity Information Facility

<http://www.gbif.org>

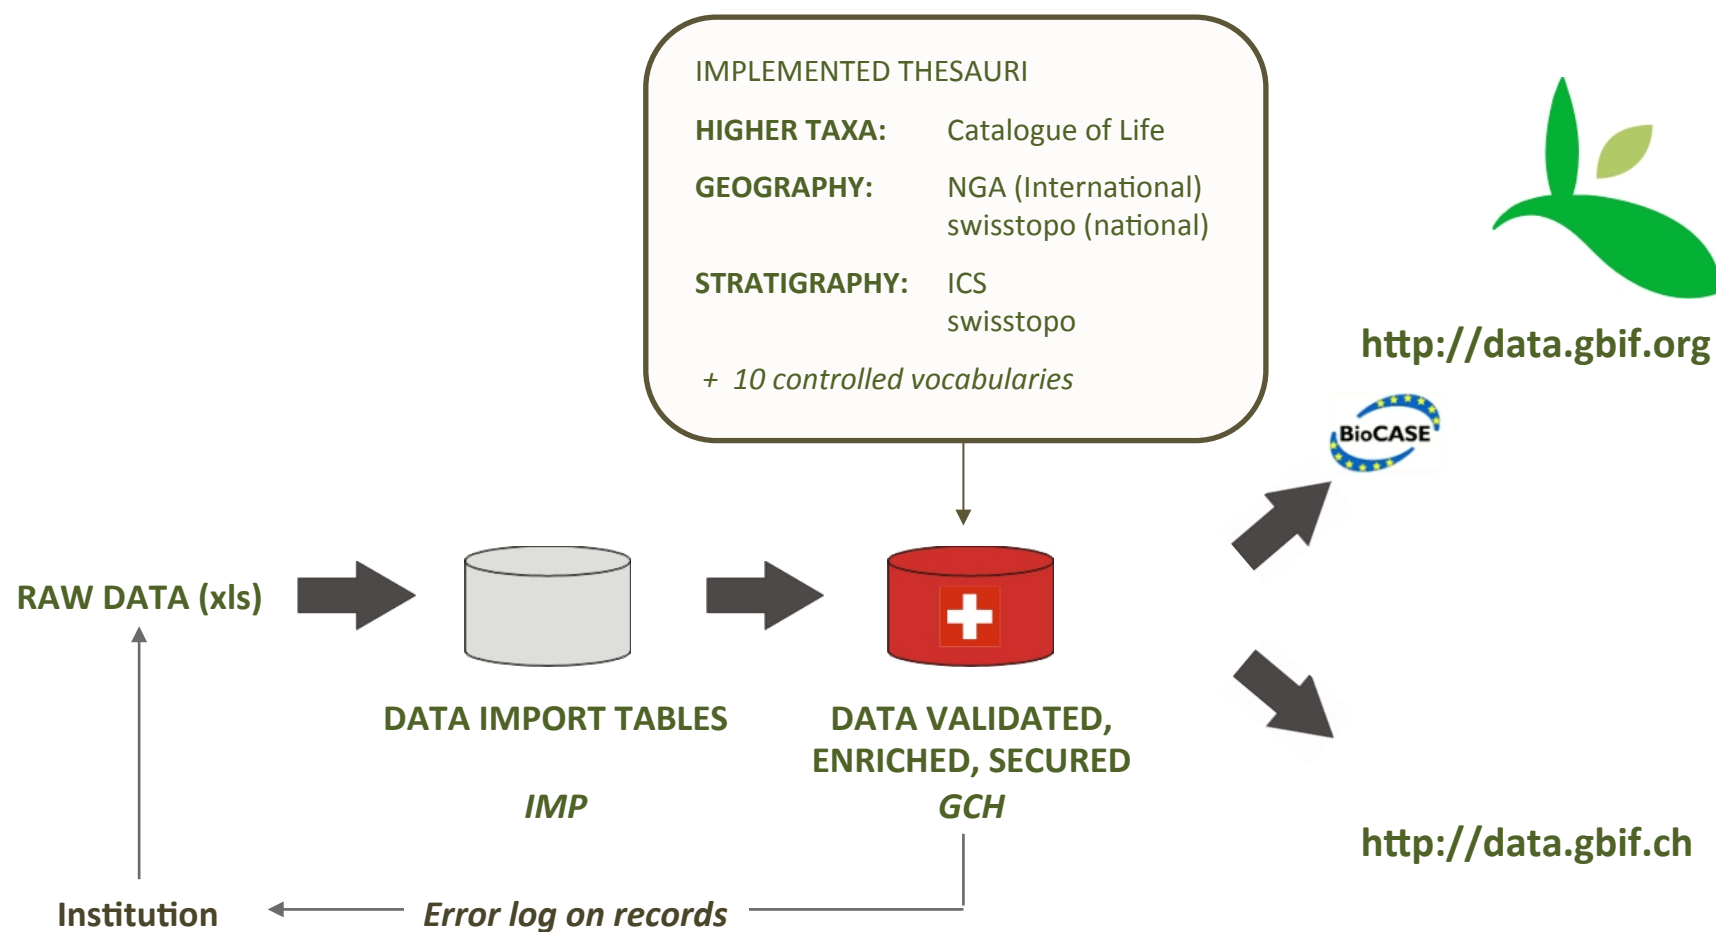

Objective :

**Free and universal diffusion of information related to
biodiversity via the Internet**

Observations and specimens.

MoU §3, Art. 1: "The purpose of GBIF is to promote, co-ordinate, design, enable and implement the compilation, linking, standardization, digitization and global dissemination and use of the world's biodiversity data, within an appropriate framework for property rights and due attribution."

A tangible result: the implementation of a high-performance system of data management and diffusion

A tangible result: the participation of 24 museums and all national databases in a project to revise and survey Swiss natural science collections

An die Direktion der naturhistorische Sammlungen verwaltenden Schweizer Institutionen und Schweizer Koordinationszentren / Nationale Datenbanken

Redaktion

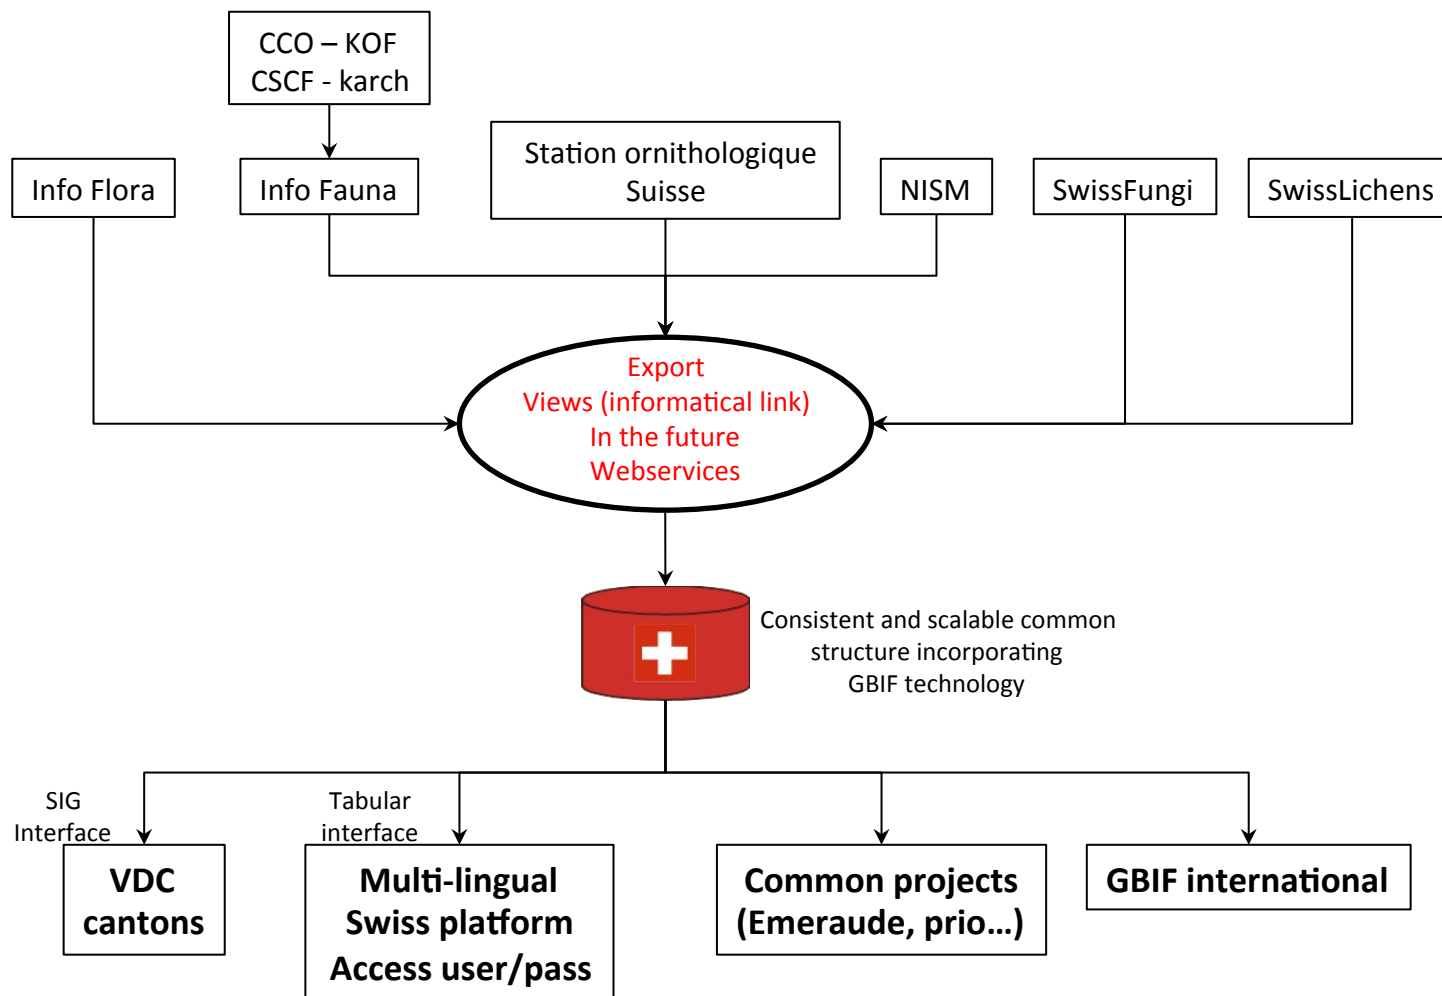

Datum	Version	Autoren	Kommentar
7.1.2010	1.0	Burckhardt D., Gonseth Y.	Erfassung
31.3.2010	1.1	Wissenschaftliche Kommission GBIF.ch	Überarbeitung
30.11.2010	1.2	Burckhardt D., Gonseth Y.	Überarbeitung

Second piece of the puzzle: in 2012, unification of national databases...

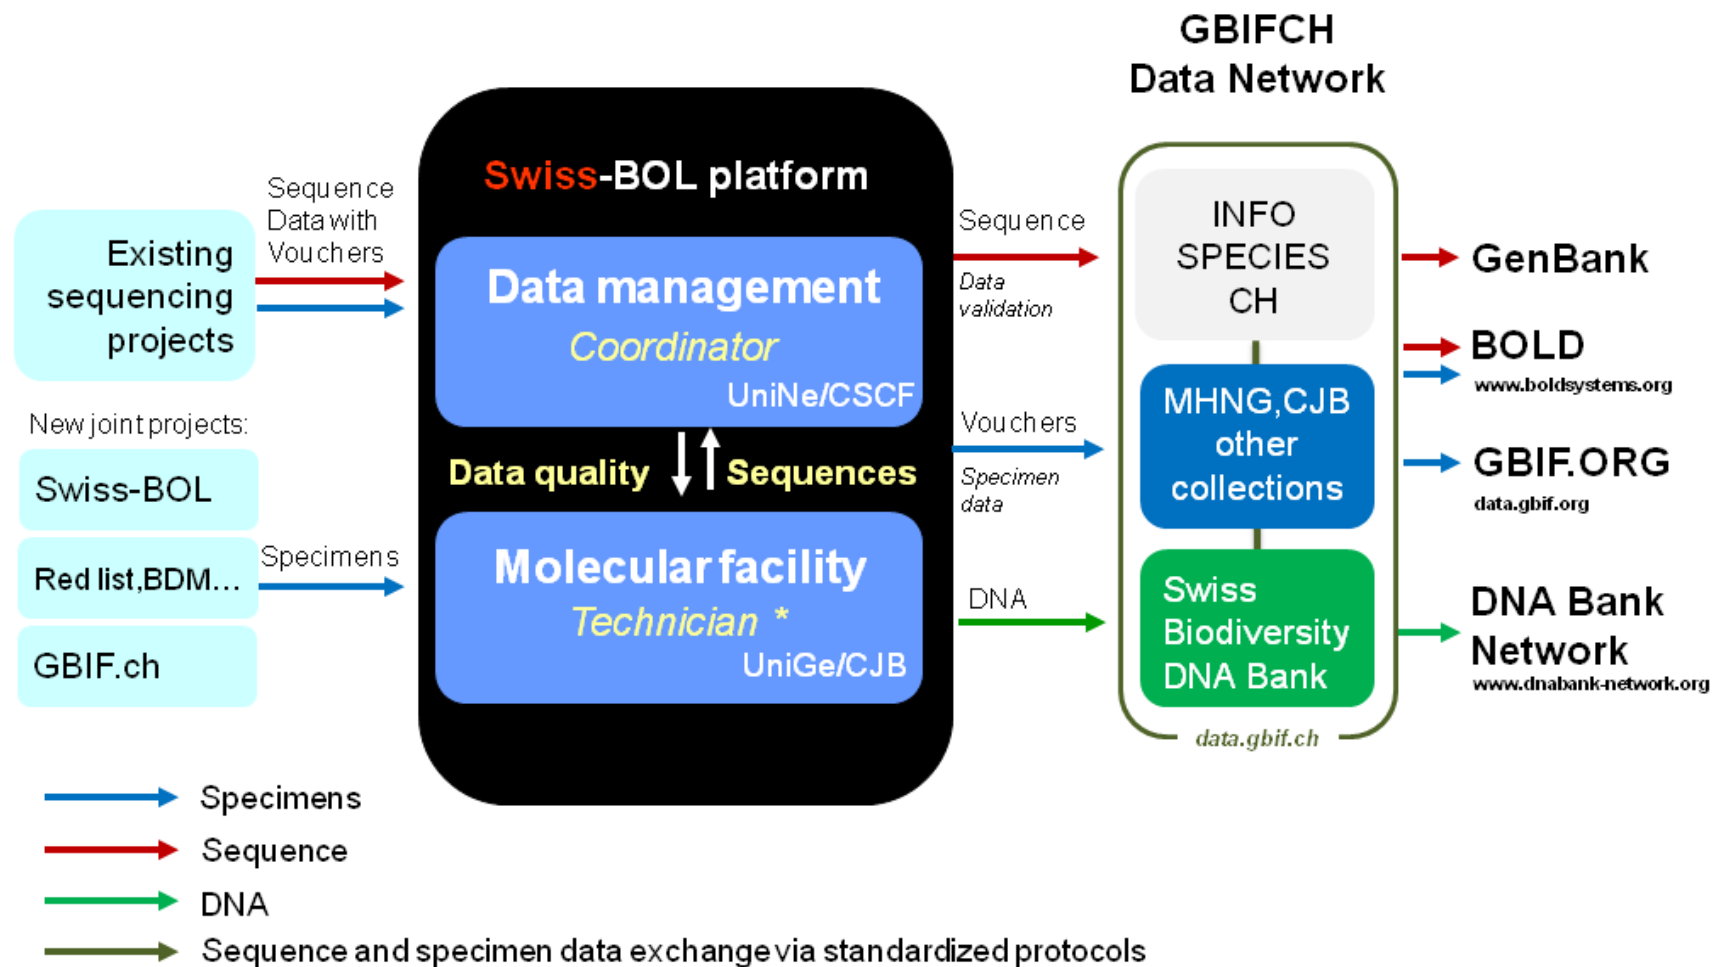

...with enormous potential!

GBIF SWISS NODE 

Third piece of the puzzle: The project SwissBOL that will be carried out in close collaboration with GBIF.ch

GBIF SWISS NODE 

The multifunctional network for the exchange of information on biodiversity is in the process of becoming reality
