

## INNOVATION AND SUSTAINABLE PROGRESS

CSEM is a Swiss private, non-profit research and technology organization with +35 years of Deep Tech development and transfer to industry.

The CSEM offers an Internship position (100%) from mid-June to mid-September 2021.

The intern in her / his work should contribute to assess the actual situation digitalisation in manufacturing SMEs in Switzerland; identify future projects that companies intend to do in the framework of Industry 4.0, in particular in robotics, AI, data analytics and industrial automation. She / he will be asked to identify social concerns related to technology adoption and evolution and understand how companies address such concerns, how people participate and how they see their role.

The work will be realized in the form of interviews that could also be accompanied by ad-hoc questionnaires. The interviewed companies will be identified by CSEM. Interviews will be done, if possible, ad personam. This work is accomplished in the framework of a SATW (Swiss Academy of Engineering Science -satw.ch) project. The ultimate goal is to organize a workshop to further streamline the aforementioned concerns and potential paths forward.

Candidates should apply to Prof. Claudia Jonczyk Sédès ([claudia.jonczyk@unine.ch](mailto:claudia.jonczyk@unine.ch)) with a CV and short letter of motivation by February 28.
