

# IBIOL EXTERNAL SEMINAR

**6 Novembre 2025**

**12:15–13:15**

**ROOM F 200**

**Claire Mérot**

**CNRS, Rennes, France**

## **The role of structural variants in the evolution of biodiversity**

**Structural genomic variation (SV), e.g. chromosomal rearrangements or copy-number variants, represent a previously hidden aspect of biodiversity. Recent technologies provide unprecedented access into SVs, allowing us to uncover its implication in adaptation or diversification.**
