# EXTERNAL SEMINAR

**28 MAY 2026**

12:15–13:15

ROOM F200

Nicolas Mathevon

**University of Saint-Etienne**

## **The voices of Nature. How and Why Animals Communicate**

How do animals talk? And what information do they share? In this overview of years of research in bioacoustics, from bird's song to crocodile's calls, we explore how animals use vocalizations to survive, mate, and express emotions, ultimately addressing whether these complex communication systems amount to true language.
