ABOUT THE NEUCHATEL PROJECT

In our TEI documents, persons, places, organisations, lemmata and keywords are tagged according to the TEI Guidelines (persName, placeName etc.).

The new portal contains the TEI documents of the latest editions, which are still in progress. Besides full-text search one can also search by persons, places, organisations and concepts (keywords and lemmata).

Plurilingualism is at the heart of this project as it allows for the possibility to search for a keyword independent of language.
