About Nestlé Research & Nestlé Clinical Development Unit

Nestlé Research is based in Lausanne, Switzerland and employs approximately 800 people. Nestlé Research combines fundamental science at the highest level, high-end analytical platforms leveraged by all research teams, and strong prototyping capabilities to accelerate the translation of science into innovation. Nestlé Research published around 1,000 scientific publications in peer review journals over the last five years, and files about 80 patents every year. Nestlé Research collaborates with approximately 100 universities or research institutes around the world. Learn more about Nestlé Research at www.nestle.com/randd

Embedded in Nestlé Research, the Clinical Development Unit is the corporate center for the development, execution and analysis of Nestlé clinical research worldwide. The evidence from well-designed and flawlessly executed clinical trials allows us to credibly communicate on the health benefits of our products or to gain knowledge that drives discovery and innovation.

More about Nestlé

The Nestlé Group is the world's largest food and beverage company with 91.4 billion Swiss Francs in sales in 2018. It is present in 190 countries around the world, has 413 factories and its 308,000 employees are committed to Nestlé's purpose of enhancing quality of life and contributing to a healthier future. Nestlé offers a wide portfolio of products and services for people and their pets throughout their lives. Its more than 2000 brands range from global icons like Nescafé or Nespresso to local favourites. Company performance is driven by its Nutrition, Health and Wellness strategy. Nestlé is based in the Swiss town of Vevey where it was founded more than 150 years ago. Learn more about our Group and reasons to join us on www.nestle.com.
