PhD conference Water Earth Systems

Date: 23rd of May, 2019

Location: University of Lausanne

The PhD school Water-Earth Systems is organizing a PhD conference in Lausanne.

The goal of the one day PhD conference is to promote exchange and interdisciplinary collaboration among the PhD students from different institutions, and to stimulate interactions of PhD students with senior researchers.

Each students will present their current work or a part of it. It has to be keep in mind that there will be very different topics and each presentation should be comprehensive for others.

The participation is required for all students of the Ph.D. School WES. All PhD students have to send one abstract (template online) to the PhD school coordinator by the **21st of March**.

Abstracts have to be written in English, not more than 1 page (max. 250 words), one picture/figure is allowed. By sending an abstract students register automatically. Preferences (15 min oral and poster) can be specified. The organizers will schedule contribution and decide about presentation type. Poster will be preferentially given to first year PhD students and oral to second year PhD students.

Other people wishing to participate can send an email to school.earth-water@unine.ch.

Participation and registration are free of charge.
